POSEIDON IONISED ALKALINE WATER PURIFIER

1. High pH POSEIDON Water Or Alkaline Water

A solution can be measured whether it is Alkaline or Acidic using pH tester. pH stands for Potential Hydrogen, is the scale degree that is used to express the level of acidity or alkalinity in a liquid or solution. The pH scale is marked from numbers 1 to 14 where the number in the middle, which is pH 7, means Neutral. All number BELOW pH 7 (from pH 1 to pH 6) means the solution is acidic, and the number Above pH 7 (from pH 8 to pH 14) means the solution is alkaline.

Here is a comparison between Soda Drink vs POSEIDON Water tested using pH tester. As you can see, after each water tested using pH tester, Soda Drink color turned to yellow, indicate it is very acidic (see pH chart color range), and POSEIDON Water turned its color to purple, indicate it is alkaline.

2. ANTIOXIDANT

POSEIDON Water contains very high antioxidant that can neutralize harmful free radicals inside your body. Free radical is an atom; molecule or ion that has unpaired electron and it is highly reactive and have the potential to cause damage to cells, including damage that may lead to cancer or premature aging. POSEIDON Water contains abundant free electrons and can donate each of its electron to every free radical so the free radicals will be neutralized and not become harmful anymore to your body.

3. Micro-Cluster

Water molecules do not just float around, all alone like microscopic drops of water. Instead, they group together in what are known as "clusters". Although there is no actual molecular bond, these molecules stick together and operate as one unit. Most drinking water is comprised of clusters containing between 16-39 water molecules, known as a Macro-Cluster.

During the ionization process through POSEIDON Water machine, these clusters are broken apart, resulting in fragmented clusters containing 4-6 water molecules, which is known as Micro-Cluster. This smaller grouping of molecules is able to penetrate and absorb into the body more effectively, which leads to a more rapid and greater degree of cellular hydration.

When you drink POSEIDON Water, you will not feel "bloated" as you drink regular water. POSEIDON Water is very delicious and very fast to be absorbed by the body and all cells inside your body. POSEIDON Water can quench your thirst at a glance, and as a result is quick hydration.

4. Alkaline Water Hydrates the Body Better

This structured water molecule is smaller in size making water up to 6X more absorb-able.

Alkaline water easily penetrates your body at cellular level, bringing a continual flood of better hydration and renewal. Cells begin to function as they should for optimum health and peak performance.

Alkalinity or being pH balanced is the perfect environment for health and wellness. God created our bodies to be just that, alkaline. It is no accident He originally made water to be alkaline as well as vegetables and herbs because it is good for us.

Some Facts About POSEIDON Water

- POSEIDON Water is a "free radical scavenger" with measurable antioxidant properties which are many times higher than any food or nutritional supplement on the market. Research shows that POSEIDON Water assists in repairing damaged DNA strands.¹
- POSEIDON Water provides a way for toxins to exit the body by neutralizing the positive, cationic charge with its abundant free electrons. Toxins stored in fat cells, tissues, organs, and lymphatic fluids are released, resulting in fat loss.²
- POSEIDON Water is "living water" that deeply hydrates the cells. It is absorbed six times faster than tap or bottled water because the cluster size of the water molecule is smaller and it has more hexagonal structures.³
- POSEIDON Water is rich in ionic minerals, like calcium. Research has shown that it significantly increases bone density.⁴

- POSEIDON Water is alkaline, it is able to neutralize and balance a chronic over acid state. Chronic over acidity is the underlying cause of many disease states, including pain, and inflammation. The body draws upon alkaline minerals stored in the bones and tissues to buffer the over acid state caused by the foods we eat, the fluids we drink, and our stressful lives. POSEIDON Water helps the body preserve and maintain its calcium, magnesium, and potassium reserves by providing ionic minerals and negative hydroxyl ions to buffer excess acids.

Technical Specifications:

Power Supply : 230V AC, 50 Hz.

System : Alkaline Water – 7.5 to 9.5 PH.

: Acidic Water through Drain – 4.5/6.5 PH.

Electrolysis Capability : Continuous Use.

ORP: -330

Cell Cleaning Method : Auto Cleaning System (Periodically Controlled by Inbuilt Microprocessor & Microcontroller).

Input Water : Municipal Corporation supplied drinking water with TDS below 400.

AMK SHRIPAD TECHNOLOGY

Sr. No. 20/4, Kharadkar Park, Kharadi, Opp. Samadhan Hotel, Near Mundhawa River Bridge, Pune – 411 014.

 +91 09021642102, 8551011599. Email :- amkindia@rocketmail.com kanademahadev@rocketmail.com

Pressure : Low Pressure application. No need of Pump.

Protections : Current Limiter, Voltage Protection.

Raw Material Used : Food Grade with Certificates.

Including Plastics.

Electrode Material : Specially designed, formulated for Drinking Water Application with Food Grade Certificates.

Electrode Plates : 2.

Elements not removable: Metallic Ions and/or salinity present in original tap water.
